

 Says

What have we heard them say?  
What can we imagine them saying?

 Thinks

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

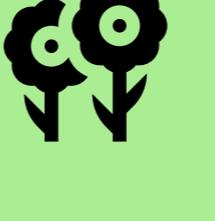

→ The people says thier negative impact ,deforestation is the first negative impact of agriculture as many forests have been cut downed to turn them into agricultural land.

→ Implementation for improving the production land reform id must in ariculture and plant many crops.

→ Government schemes are yet to reach small farmers

 Increase agricultural productivity and household income for smallholder farmers,enable equitable consumption of safe,affordable & nutrition diets year-round.

 Advance women's empowerment in the agricultural sector.

 In fact,india like many other countries has an agrarian economy that is largely dependent on the agricultural sector

Does

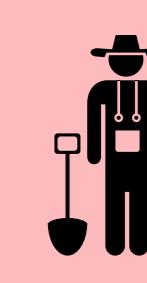

What behavior have we observed?  
What can we imagine them doing?

 Feels

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?

Seek to understand the behaviour of individual decision-makers,usually the farmers or land managers directly responsible for the land.

Food Production: Farmers are responsible for producing the vast majority of the world's food supply.

Checking on crops ,plowing or bailing up grass for cows to eat in the winter ,general farm maintenance.

We use to depend completely on monsoon for the cultivation of food grains but now we have constructed dams,canals,tube-wells and pump sets.

We now have a better variety of fertilizers ,pesticides, and seeds which help us to grow more food in comparison to what we produce during old times.

It is not wrong to say that the food we eat is the gift of agriculture activities and indian farmers who work their sweat to provide us this food.
